

NEW FROM UKSSH: FULLY ENCLOSED TREADS WITH INTEGRATED NON-SLIP GRP COATINGS FOR PUBLIC ACCESS STAIRCASES.

UKSSH has been at the forefront of supplying fully compliant public access staircases for over a decade, with a range of step options including solid treads, enclosed backs and GRP (non-slip) treads.

Many clients – including those in the Rail sector, festival organisers and sporting venues – asked if we could design a temporary public access staircase that goes one step further by delivering maximum privacy for stair users while (just like our existing range of step options) continuing to tick every box in the HSE wish list.

UKSSH's solution are fully enclosed treads with integrated non-slip GRP coatings for Haki public access staircases. Available in addition to all of the existing step options, UKSSH's latest innovation has already met with widespread approval.
